Leadership U Jun 20 2019 Accelerating Through the Crisis Curve Leadership is all about others—inspiring them to believe, then enabling that belief to become reality. That’s the essence of Leadership U: it starts with ‘U’ but it’s not about ‘U.’ Those timeless words are timelier than ever today, as leaders look to accelerate through the crisis curve. As author Gary Burnison observes, “There will likely be more change in the next two years than we have seen in the last twenty.” Now, in Leadership U: Accelerating Through the Crisis Curve, Burnison lays out a framework—his “Six Degrees of Leadership”—to show leaders how to create change. Anticipate - foreseeing what lies ahead, amid ambiguity and uncertainty that are throttled up like never before Navigate - course-correcting in real time, to keep the organization on an even keel Communication - constantly connecting with others; the leader is both the messenger and the message Listen - breaking down the organizational hierarchy to gather insights at all levels—especially what the leader doesn’t want to hear Learn - applying learning agility, to “know what to do when you don’t know what to do” Lead - empowering others in a bottom-up culture that is more nimble, agile, innovative, and entrepreneurial than ever before. Only by embracing these truths can leaders master another ‘U’—the “crisis curve” that will completely disrupt the business landscape. The world has changed—forever. The old days are fine to reminisce about, but you can’t stay there. Today leadership means becoming comfortable with being uncomfortable. As Burnison says, when a door closes, leaders cannot afford to stand there, staring at it. It’s a “get up or give up” moment. For leaders, the only choice is to find and open another door. Leadership U defines and inspires the pathway through that door.

No Limits Jan 20 2022 #1 New York Times bestselling author John C. Maxwell's latest book will enhance the lives of leaders, professionals, and anyone who wants to achieve success and personal growth. We often treat the word capacity as if it were a natural law of limitation. Unfortunately, most of us are much more comfortable defining what we perceive as off limits rather than what's really possible. Could it be that many of us have failed to expand our potential because we have allowed what we perceive as capacity to define us? What if our limits are not really our limits? In his newest book, John Maxwell identifies 17 core capacities. Some of these are abilities we all already possess, such as energy, creativity and leadership. Others are aspects of our lives controlled by our choices, like our attitudes, character, and intentionality. Maxwell examines each of these capacities, and provides clear and actionable advice on how you can increase your potential in each. He will guide you on how to identify, grow, and apply your critical capacities. Once you've blown the "cap" off your capacities, you'll find yourself more successful--and fulfilled--in your daily life.

Embedded Multi-Level Leadership in Elite Sport Aug 03 2020 This book represents an alternative perspective on international elite sport systems. It focusses on the embedded multi-level nature of leadership, and the scope that this might give for degrees of leadership autonomy and discretion. The chapters show how mechanisms of leadership on different levels interact. The nature and mix of leadership mechanisms reflect values and expectations related to specific political, normative and commercial sport contexts. Three introductory chapters outline key elements of these dimensions of elite sport contexts. Seven empirical cases illustrate how national contexts facilitate and constrain leadership practices, related to specific sports across Russia, China, Ghana, Germany, Switzerland, Denmark, Norway and the US. The final chapter discusses embedded multi-level leadership from a comparative perspective. Based on the countries covered, the book distinguishes between three groups: state-dominated systems, state-elite sport partnership and countries with a passive state, with no state intervention. This book is important reading for researchers and students with an interest in sport management, sport development, sport policy and sport governance, as well as for policy-makers, performance directors and managers working in elite sport.

He shows how using the techniques of animal trainers -- specifically those responsible for the killer whales of SeaWorld -- can supercharge your effectiveness at work and at home. When gruff business manager and family man Wes Kingsley visited SeaWorld, he marveled at the ability of the trainers to get these huge killer whales, among the most feared predators in the ocean, to perform amazing acrobatic leaps and dives. Later, talking to the chief trainer, he learned their techniques of building trust, accentuating the positive, and redirecting negative behavior -- all of which make these extraordinary performances possible. Kingsley took a hard look at his own often accusatory management style and recognized how some of his shortcomings as a manager, spouse, and father actually diminish trust and damage relationships. He began to see the difference between "GOTcha" (catching people doing things wrong) and

"Whale Done!" (catching people doing things right). In Whale Done!, Ken Blanchard shows how to make accentuating the positive and redirecting the negative the best tools to increase productivity, instead of creating situations that demoralize people. These techniques are remarkably easy to master and can be applied equally well at home, allowing readers to become better parents and more committed spouses in their happier and more successful personal lives.
