Handbook of Paper and Paperboard Packaging Technology Oct 31 2022

The definitive industry reference on the paper and paperboard packaging sector. Now in a fully revised and updated second edition, this book discusses all the main types of packaging based on paper and paperboard. It considers the raw materials, the manufacture of paper and paperboard, and the basic properties and features on which packaging made from these materials depends for its appearance and performance. The manufacture of twelve types of paper- and paperboard-

based packaging is described, together with their end-use applications and the packaging machinery involved. The importance of pack design is stressed, as well as how these materials offer packaging designers opportunities for imaginative and innovative design solutions. Environmental factors, including resource sustainability, societal and waste management issues are addressed in a dedicated chapter. The book is directed at readers based in companies which manufacture packaging grades of paper and paperboard, companies involved in the design, printing and production of packaging, and companies which manufacture inks, coatings, adhesives and packaging machinery. It will be essential reading for students of packaging technology and technologists working in food manufacturing who are users of paper and paperboard packaging

products. Praise for the First Edition 'This book is a valuable addition to the library of any forward-looking company by providing in-depth coverage of all aspects of packaging which involve the most ecologically acceptable material, namely paper and paperboard.'—International Journal of Dairy Technology '...a welcome contribution to a field where coverage was previously limited to subject-specific books... or to single chapters in textbooks on broader aspects of packaging technology.'—Packaging Technology and Science

Cartons, Crates and Corrugated Board, Second Edition May 02 2020

New expanded second edition with key technical, regulatory and marketing developments from the past 10 years in the packaging industry. Covers the materials, processes, and design of virtually all paper and fiberboard packaging for end-products, displays, storage and distribution. New information on European and global standards, selection criteria for paperboard, as well as emerging sustainability initiatives. Explains recent tests, measurements and costs with ready-to-use calculations. Ten years ago, the first edition of *Cartons, Crates and Corrugated Board* quickly became the standard reference book for wood- and paper-based packaging. Endorsed by TAPPI and other professional societies and used as a textbook worldwide, the book has now been extensively revised and updated by a team formed by the original authors and two additional authors. While preserving the critical performance and design data of the previous edition, this second expanded edition offers new information on the technologies, tests and regulations impacting the paper and corrugated industries worldwide, with a special focus on Europe and Japan. New information has been added on tests and novel designs for folded cartons, as well as expanded discussions of

Handbook of Paper and Board Jun 26 2022 Papermaking is a fascinating art and technology. The second edition of this successful 2 volume handbook provides a comprehensive view on the technical, economic, ecologic and social background of paper and board. It has been updated, revised and largely extended in depth and width including the further use of paper and board in converting and printing. A wide knowledge basis is a prerequisite in evaluating and optimizing the whole process chain to ensure efficient paper and board production. The same is true in their application and end use. The book covers a wide range of topics: * Raw materials required for paper and board manufacturing such as fibers, chemical additives and fillers * Processes and machinery applied to prepare the stock and to produce the various paper and board grades including automation and trouble shooting * Paper converting and printing processes, book preservation * The different paper and board grades as well as testing and analysing fiber suspensions, paper and board products, and converted or printed matters * Environmental and energy factors as well as safety aspects. The handbook will provide professionals in the field, e. g. papermakers as well as converters and printers, laymen, students, politicians and other interested people with the most up-to-date and comprehensive information on the state-of-the-art techniques and aspects involved in paper making, converting and printing.

Paper and Paperboard Production, Availability, and Imports of India

Oct 19 2021 Paper Is Essential For National Security. It Is Of Substantial Importance For The Economic Prosperity Of The Country. A Variety Of Paper And Paper Products Are Produced In India. Economic Growth Is Accompanied By The Increasing Need For Paper And Paper Products. It Is More So In The Case Of A Developing Economy Like India, Which Has Been Striving For Rapid Industrialization, Blended With The Objectives Of Liberalization And Globalization. Regarding Paper And Paperboard, Two Facts Appear To Be Special For Indian Economy. Firstly, Per Capita Paper Consumption In India Has Been One Of The

Lowest In The World. Secondly, Domestic Production Is Not Sufficient To Meet The Growing Consumption Needs Of The Economy. Though Paper Industry Continues To Progress Under Successive Five Year Plans, Imports Of Paper And Paperboard Continue To Be A Regular Feature Of The Indian Economy, As India Is Not Self- Sufficient In Respect Of Paper And Paperboard, Particularly In Speciality Papers. The Present Book Analyses The Magnitude And Determinants Of Paper And Paper Products Import Of India And Ways And Means To Make The Industry Internationally Competitive.
