Wabi-Sabi - Photo School Apr 12 2021 Wabi-Sabi Photo School The Beauty of Photography (Deutsch-English) Wabi-Sabi is a Japanese philosophic and aesthetic concept which has touched us in a deep way. With the help of our co-author, Japanese artist Natsuko Horinouchi-Podzimek, we created an ebook on how we can avail ourselves of the aesthetics of Wabi-Sabi for our photography. We see Wabi-Sabi as a way for us European photographers to free ourselves from the honey trap technology and perfection-mania set up for us. In Wabi-Sabi, there is room for "mistakes". The most important in Wabi-Sabi is not the perfect photograph but the expression and depth of the image. On the contrary! It is especially the absence of perfection – e.g. the light flares, the blurs, the haziness, the deep shadows – that transforms a prosaic photography into poetry. At the same time the philosophy of Wabi-Sabi is

characterized by reduction, modesty, and a symbiotic relationship to nature. There is a truth behind Wabi-Sabi we always yearned to find in photography. In our e-Book “Wabi-Sabi – The beauty of photography” we show you how this concept can help you finding your very own way of photography which is characterized by more depth, substance, and emotions. Photography is more than just technology and fancy gadgets. We are convinced, that photography is pure passion, inspiration, and a wonderful way to express our emotions. So let yourself be inspired by the philosophy of an ancient culture. Find your very own photographic style with the help of our photographic exercises. Records Ruin the Landscape Oct 31 2022 John Cage's disdain for records was legendary. He repeatedly spoke of the ways in which recorded music was antithetical to his work. In *Records Ruin the Landscape*, David Grubbs argues that, following Cage, new genres in experimental and avant-garde music in the 1960s were particularly ill suited to be represented in the form of a recording. These activities include indeterminate music, long-duration minimalism, text scores, happenings, live electronic music, free jazz, and free improvisation. How could these proudly evanescent performance practices have been adequately represented on an LP? In their day, few of these works circulated in recorded form. By contrast, contemporary listeners can encounter this music not only through a flood of LP and CD releases of archival recordings but also in even greater volume through Internet file sharing and online resources. Present-day listeners are coming to know that era's experimental music through the recorded artifacts of composers and musicians who largely disavowed recordings. In *Records Ruin the Landscape*, Grubbs surveys a musical landscape marked by altered listening practices.
