[Sustainable Construction Materials](#) Dec 29 2019 **Sustainable Construction Materials: Copper Slag**, as part of a series of five, the book aims to promote the use of sustainable construction materials. It is different to the norm and its uniqueness lies in developing a data matrix sourced from 400 publications, contributed by 712 authors from 337 institutions in 40 countries from 1964 to 2015, on the subject of copper slag as a construction material, and systematically, analysing, evaluating and modelling this information for use in cement, concrete, geotechnics and road pavement applications. Related environmental issues, case studies and standards are also discussed. The work establishes what is already known and can be used. It would also help to avoid repetitive research and save valuable resources, which can instead be directed towards new research to progress the use of sustainable construction materials. The book is structured in an incisive and easy to digest manner. As an excellent reference source, the book is particularly suited for researchers, academics, design engineers, specifiers, contractors, developers and certifying and regulatory authorities, seeking to promote sustainability within the construction sector. Provides an extensive source of valuable database information supported by an exhaustive and comprehensively organized list of globally published literature spanning 40-50 years, up to 2016, with over 400 references Offers an analysis, evaluation, repackaging, and modeling of existing knowledge, encouraging more responsible use of waste materials in construction Presents a wealth of knowledge for use in many sectors relating to the construction profession

Renewable Energy Optimization, Planning and Control Sep 05 2020 This book gathers selected high-quality research papers presented at International Conference on Renewable Technologies in Engineering (ICRTE 2021) organized by Manav Rachna International Institute of Research & Studies, Faridabad, Haryana, India, during 15–16 April 2021. The book includes conference papers on the theme “Computational Techniques for Renewable Energy Optimization”, which aims to bring together leading academic scientists, researchers and research scholars to exchange and share their experiences and research results on all aspects of renewable energy integration, planning, control and optimization. It also provides a premier interdisciplinary platform for researchers, practitioners and educators to present and discuss the most recent innovations, trends and concerns as well as practical challenges encountered and solutions adopted in the fields of renewable energy and resources.

Advances in Mechanical Engineering Sep 29 2022 This book comprises select proceedings of the International Conference on Recent Innovations and Developments in Mechanical Engineering (IC-RIDME 2018). The book contains peer reviewed articles covering thematic areas such as fluid mechanics, renewable energy, materials and manufacturing, thermal engineering, vibration and acoustics, experimental aerodynamics, turbo machinery, and robotics and mechatronics. Algorithms and methodologies of real-time problems are described in this book. The contents of this book will be useful for both academics and industry professionals.

Herbs, Spices and Their Roles in Nutraceuticals and Functional Foods Mar 31 2020 *Herbs, Spices and Their Roles in Nutraceuticals and Functional Foods* gives an overview of the many pharmacological activities associated with herbs and spices, including detailed coverage on their mechanisms and formulations for the food industry. Chapters focus on key ingredients such as *Curcuma longa*, *Piper Nigrum* and *Trigonella foenum-graecum*, with contributors across the globe providing the latest research and advances for each. This is an essential read for scientists who want to understand the fundamental mechanisms behind the bioactive compounds within herbs and spices. The numerous phytochemicals present in plant extracts

have multiple pharmacological activities so there is extensive research into new bioactive compounds. The pharmacological activities of herbs and spices have been thoroughly investigated, and it is crucial that the latest research is organized into a comprehensive resource. Presents chapters that are organized by specific herb or spice, providing comprehensive coverage of mechanism and innovative formulations Provides in-depth analysis of multiple pharmacological activities Includes detailed coverage surrounding the food industry

Avian Reproduction Jul 16 2021 This book provides everything from basic knowledge to the recent understandings of avian reproductive physiology, covering many unique aspects. It will inspire avian biologists as well as researchers in varied fields and will offer important steps towards better fertilization success in birds. In spite of the recent remarkable developments in modern technology, a comprehensive understanding of the reproductive mechanisms is still far in the future due to the diverse reproductive tactics in vertebrates. Birds have highly refined reproductive strategies and some of those strategies are unique to birds. However, together with ongoing progress of the genome analysis of birds and the crying need for further increase in meat and egg production, research on avian reproduction is now accelerating and becoming more important. With contributions by leading scientists, the book explains avian primordial germ cells; the sex-determining mechanism; reproductive endocrinology and immunology; sperm, egg, and egg coat; sperm-egg interaction; polyspermic fertilization; seasonal reproduction; social triggers; hormonal and behavioral changes; broodiness; oviductal sperm storage; and biotechnology. This book is recommended for all researchers and students who are interested in birds or reproduction.

Missing Data in Longitudinal Studies Aug 24 2019 Drawing from the authors' own work and from the most recent developments in the field, Missing Data in Longitudinal Studies: Strategies

for Bayesian Modeling and Sensitivity Analysis describes a comprehensive Bayesian approach for drawing inference from incomplete data in longitudinal studies. To illustrate these methods, the authors employ several data sets throughout that cover a range of study designs, variable types, and missing data issues. The book first reviews modern approaches to formulate and interpret regression models for longitudinal data. It then discusses key ideas in Bayesian inference, including specifying prior distributions, computing posterior distribution, and assessing model fit. The book carefully describes the assumptions needed to make inferences about a full-data distribution from incompletely observed data. For settings with ignorable dropout, it emphasizes the importance of covariance models for inference about the mean while for nonignorable dropout, the book studies a variety of models in detail. It concludes with three case studies that highlight important features of the Bayesian approach for handling nonignorable missingness. With suggestions for further reading at the end of most chapters as well as many applications to the health sciences, this resource offers a unified Bayesian approach to handle missing data in longitudinal studies.

Understanding Culture and Society in India Feb 08 2021 This book is an in-depth account of people's cultural and religious life in the Jammu region of Jammu and Kashmir, India. It brings out the significance of Sufi and deity shrines as alternative places of worship that give meaning and purpose to people's lives. It includes sites and practices commonly associated with Islam/Sufism and Hinduism as spaces of shared culture. Most of the existing literature of Jammu and Kashmir is on Kashmir focusing mostly on topics such as politics, state, identity, conflict or violence. This book proposes to go beyond these works by delimiting the focus and area of the study to culture, society and religion. It explores the sites of religious pluralism and tolerance in the violence-ridden territory of Jammu and Kashmir. The chapters are mainly based on ethnographic data collected through qualitative methods like observation – participant and non-participant, case studies, in-depth interviews and oral history. The book is of interest to researchers, both faculty and graduate students, in the areas of sociology of religion, social anthropology, religious studies, cultural studies, Sufism, shrines and deity worship in South Asia.

Artificial Intelligence and Speech Technology Oct 26 2019 The 2nd International Conference on Artificial Intelligence and Speech Technology (AIST2020) was organized by Indira Gandhi Delhi Technical University for Women, Delhi, India on November 19–20, 2020. AIST2020 is dedicated to cutting-edge research that addresses the scientific needs of academic researchers and industrial professionals to explore new horizons of knowledge related to Artificial Intelligence and Speech Technologies. AIST2020 includes high-quality paper presentation sessions revealing the latest research findings, and engaging participant discussions. The main focus is on novel contributions which would open new opportunities for providing better and low-cost solutions for the betterment of society. These include the use of new AI-based approaches like Deep Learning, CNN, RNN, GAN, and others in various Speech related issues like speech synthesis, speech recognition, etc.

Natural and Synthetic Biomedical Polymers Sep 25 2019 Polymers are important and attractive biomaterials for researchers and clinical applications due to the ease of tailoring their chemical, physical and biological properties for target devices. Due to this versatility they are rapidly replacing other classes of biomaterials such as ceramics or metals. As a result, the demand for biomedical polymers has grown exponentially and supports a diverse and highly monetized research community. Currently worth \$1.2bn in 2009 (up from \$650m in 2000), biomedical polymers are expected to achieve a CAGR of 9.8% until 2015, supporting a current research community of approximately 28,000+. Summarizing the main advances in biopolymer

development of the last decades, this work systematically covers both the physical science and biomedical engineering of the multidisciplinary field. Coverage extends across synthesis, characterization, design consideration and biomedical applications. The work supports scientists researching the formulation of novel polymers with desirable physical, chemical, biological, biomechanical and degradation properties for specific targeted biomedical applications.

Combines chemistry, biology and engineering for expert and appropriate integration of design and engineering of polymeric biomaterials Physical, chemical, biological, biomechanical and degradation properties alongside currently deployed clinical applications of specific biomaterials aids use as single source reference on field. 15+ case studies provides in-depth analysis of currently used polymeric biomaterials, aiding design considerations for the future

Handbook of Research on IT Applications for Strategic Competitive Advantage and Decision Making Nov 27 2019

To date, a plethora of companies and organizations are investing vast amounts of money on the latest technologies. Information technology can be used to improve market share, profits, sales, competitive advantage, and customer/employee satisfaction. Unfortunately, the individuals meant to use these technologies are not well equipped on how to effectively and efficiently use these tools for competitive advantage and decision making. The Handbook of Research on IT Applications for Strategic Competitive Advantage and Decision Making is a collection of innovative research relevant to the methodologies, theoretical frameworks, and latest empirical research findings in information technology applications, strategic competitive advantage, and decision making. While highlighting topics including agility, knowledge management, and business intelligence, this book is ideally designed for information technology professionals, academics, researchers, managers, executives, and government officials interested in using information technology for strategic competitive advantage and better decision making.

Hindu Spirituality Nov 07 2020 The term hindu is referred to the religious life of the people of India, and Spirituality understood as wisdom about the way back into the ground of pluralism of religious forms. These two volumes are structured along the division between the classical and the postclassical. Twenty seven scholars from around the world shed light on the spiritual beauty of Hinduisms poetry art and temples, festivals and music, as well as the contributions of modern pioneers such as Swami Vivekananda Sri Aurobindo, Mahatma Gandhi and others.

Science, the Self, and Survival after Death Feb 29 2020 Ian Stevenson was a prominent and internationally-known psychiatrist, researcher, and well-regarded figure in the field of psychical research. *Science, the Self, and Survival after Death* is the first book devoted to surveying the entirety of his work and the extraordinary scope and variety of his research. He studied universal questions that cut to the core of a person's identity: What is consciousness? How did we become the unique individuals that we are? Do we survive in some form after death? Stevenson's writings on the nature of science and the mind-body relationship, as well as his empirical research, demonstrate his strongly held belief that the methods of science can be applied successfully to such humanly vital questions. Featuring a selection of his papers and excerpts from his books, this collection presents the larger context of Stevenson's work and illustrates the issues and questions that guided him throughout his career.

RECENT TRENDS IN E-MARKETING Oct 31 2022 The internet was hyped as a revolutionary tool of the twentieth century like the telephone and television. Today, internet has virtually become a household name in India. In a short span of time, Internet and World Wide Web has been viewed as the most vital medium for information, entertainment, communication and commerce. Today, internet has become a necessity for everyone. With the proliferation of Internet, the E-commerce and e-business concepts have expanded. Therefore, a boost in the expansion of the internet in the country will not only help countries to become a vital player of

the emerging global economy, but will also enable the citizens of the country to avail the benefits associated with the web technologies.

Sturkie's Avian Physiology Dec 21 2021 *Sturkie's Avian Physiology*, Seventh Edition is the classic, comprehensive, single volume on the physiology of domestic and wild birds. This latest edition is thoroughly revised and updated with several new chapters with entirely new content on such topics as vision, sensory taste, pain reception, evolution and domestication. Chapters throughout have been greatly expanded due to the many recent advances in the field. This book is written by international experts in different aspects of avian physiology. For easy reading and searches, the book is structured under a series of themes, beginning with genomic studies, sensory biology and nervous systems, and major organs. This book is an important resource for ornithologists, poultry scientists, and other researchers in avian studies. It is also useful for students in avian or poultry physiology, as well as avian veterinarians. Stands out as the only single volume devoted to bird physiology. Features updates, revisions or additions to each chapter. Written and edited by international leaders in avian studies.

Cybernetics, Cognition and Machine Learning Applications Jul 04 2020 This book includes the original, peer reviewed research articles from the 2nd International Conference on Cybernetics, Cognition and Machine Learning Applications (ICCCMLA 2020), held in August, 2020 at Goa, India. It covers the latest research trends or developments in areas of data science, artificial intelligence, neural networks, cognitive science and machine learning applications, cyber physical systems and cybernetics.

Computational Welding Mechanics Jun 22 2019 *Computational Welding Mechanics (CWM)* provides readers with a complete introduction to the principles and applications of computational welding including coverage of the methods engineers and designers are using in computational welding mechanics to predict distortion and residual stress in welded structures, thereby creating safer, more reliable and lower cost structures. Drawing upon years of practical experience and the study of computational welding mechanics the authors instruct the reader how to: - understand and interpret computer simulation and virtual welding techniques including an in depth analysis of heat flow during welding, microstructure evolution and distortion analysis and fracture of welded structures, - relate CWM to the processes of design, build, inspect, regulate, operate and maintain welded structures, - apply computational welding mechanics to industries such as ship building, natural gas and automobile manufacturing. Ideally suited for practicing engineers and engineering students, *Computational Welding Mechanics* is a must-have book for understanding welded structures and recent technological advances in welding, and it provides a unified summary of recent research results contributed by other researchers.
