Phonology for Communication Disorders Jan 08 2021 This textbook describes the approaches to phonology that are most relevant to communication disorders. It examines schools of thought in theoretical phonology, and their relevance to description, explanation and remediation in the clinical context. A recurring theme throughout the book is the distinction between phonological theories that attempt elegant, parsimonious descriptions of phonological data, and those that attempt to provide a psycholinguistic model of speech production and perception. This book introduces all the relevant areas of phonology to the students and practitioners of speech-language pathology and is a companion volume to the authors' Phonetics for Communication Disorders.

The Societal Codification of Korean English Aug 15 2021 From K-pop to kimchi, Korean culture is becoming increasingly popular on the world stage. This cultural internationalisation is also mirrored

linguistically, in the emergence and development of Korean English. Often referred to as 'Konglish', this book describes how the two terms in fact refer to different things and explains how Koreans have made the English language their own. Arguing that languages are no longer codified and legitimised by dictionaries and textbooks but by everyday usage and media, Alex Baratta explores how to reconceptualise the idea of 'codification.' Providing illustrative examples of how Koreans have taken commonly used English expressions and adjusted them, such as doing 'Dutch pay', wearing a 'Burberry' and using 'hand phones', this book explores the implications and opportunities social codification presents to EFL students and teachers. In so doing, *The Societal Codification of Korean English* offers wider perspectives on English change across the world, seeking to dispel the myth that English only belongs to 'native speakers'.

Connectives as Discourse Landmarks Sep 04 2020 This set of eleven articles, by linguists from four different European countries and a variety of theoretical backgrounds, takes a new look at the discourse functions of a number of English connectives, from simple coordinators (and, but) to phrases of varying complexity (after all, the fact is that). Using authentic spoken and written data from varied sources, the authors explore the ways in which current uses of connectives result from the interaction of syntax, semantics and prosody, both over time and through diversity of discourse situations. Most adopt an integrative approach in which speaker-listener or writer-reader relationships are viewed as part and parcel of the linguistic properties of each marker. Because it combines functional, generative and enunciative approaches into a coherent whole with a common explanatory aim, this book will be of interest to linguists, corpus-linguists and all those who investigate the semantics-pragmatics interface.

Human Communication Jul 22 2019 Originally published in 1974. This is an introductory text on the basic processes in communication with each chapter written by an eminent theorist in one of the main disciplines dealing with communication. It both surveys the range of issues and presents the individual author's personal theoretical approach in each case. Though introductory, the chapters here, while attempting to be representative and to avoid unnecessary jargon, are careful to not oversimplify. Each author presents an original thesis providing a first-hand glimpse of scholarly work in the discipline

showing the great diversity among the approaches and levels of analysis used in the study of communication. Of great usefulness to students of psychology, language, linguistics, media and social history.

Metaphor and Intercultural Communication Dec 19 2021 Metaphor and Intercultural Communication examines in detail the dynamics of metaphor in interlingual contact, translation and globalization processes. Its case-studies, which combine methods of cognitive metaphor theory with those of corpus-based and discourse-oriented research, cover contact linguistic and cultural contacts between Chinese, English including Translational English and Aboriginal English, Greek, Kabyle, Romanian, Russian, Serbian, and Spanish. Part I introduces readers to practical and methodological problems of the intercultural transfer of metaphor through empirical (corpus-based and experimental) studies of translators' experiences and strategies in dealing with figurative language in a variety of contexts. Part II explores the universality-relativity dimension of cross- and intercultural metaphor on the basis of empirical data from various European and non-European cultures. Part III investigates the socio-economic and political consequences of figurative language use through case studies of communication between aboriginal and mainstream cultures, in the media, in political discourse and gender-related discourses. Special attention is paid to cases of miscommunication and of deliberate re- and counter-conceptualisation of clichés from one culture into another. The results open new perspectives on some of the basic assumptions of the 'classic' cognitive paradigm, e.g. regarding metaphor understanding, linguistic relativity and concept-construction.

Beyond Misunderstanding Jul 02 2020 This book challenges two tacit presumptions in the field of intercultural communication research. Firstly, misunderstandings can frequently be found in intercultural communication, although, one could not claim that intercultural communication is constituted by misunderstandings alone. This volume shows how new perspectives on linguistic analyses of intercultural communication go beyond the analysis of misunderstanding. Secondly, intercultural communication is not solely constituted by the fact that individuals from different cultural groups interact. Each contribution of this volume analyses to what extent instances of discourse are institutionally and/or interculturally determined. These linguistic reflections involve different theoretical frameworks, e.g. functional grammar, systemic functional linguistics, functional pragmatics, rhetorical conversation analysis, ethno-methodological conversation analysis, linguistic anthropology and a critical discourse approach. As the contributions focus on the discourse of genetic counseling, gate-keeping discourse, international team co-operation, international business communication, workplace discourse, internet communication, and lamentation discourse, the book exemplifies that the analysis of intercultural communication is organized in response to social needs and, therefore, may contribute to the social justification of linguistics.

Divided into five parts, *Computer Games and Technical Communication* engages with questions related to workplace communities and gamic simulations; industry documentation; manuals, gameplay, and ethics; training, testing, and number crunching; and the work of games and gamifying work. In that computer games rely on a complex combination of written, verbal, visual, algorithmic, audio, and kinesthetic means to convey information, technical and professional writing scholars are uniquely poised to investigate the intersection between the technical and symbolic aspects of the computer game complex. Vocative Constructions in the Language of Shakespeare Sep 16 2021 This study investigates the functions, meanings, and varieties of forms of address in Shakespeare's dramatic work. New categories of Shakespearean vocatives are developed and the grammar of vocatives is investigated in, above, and below the clause, following morpho-syntactic, semantic, lexicographical, pragmatic, social and contextual criteria. Going beyond the conventional paradigm of power and solidarity and with recourse to Shakespearean drama as both text and performance, the study sees vocatives as foregrounded experiential, interpersonal and textual markers. Shakespeare's vocatives construe, both quantitatively and qualitatively, habitus and identity. They illustrate relationships or messages. They reflect Early Modern, Shakespearean, and intra- or inter-textual contexts. Theoretically and methodologically, the study is interdisciplinary. It draws on approaches from (historical) pragmatics, stylistics, Hallidayean grammar, corpus linguistics, cognitive linguistics, socio-historical linguistics, sociology, and theatre

semiotics. This study contributes, thus, not only to Shakespeare studies, but also to literary linguistics and literary criticism.
