Modifying the Aerodynamics of Your Road

Car Sep 19 2019 This unique handbook assumes

no starting knowledge of vehicle aerodynamics.

It begins with simple ideas and finishes with sophisticated and effective aerodynamic modifications that work. Three major chapters cover on-road testing techniques that give you all the information you need to decide what modifications you should make - and, after

you've made them, how well they work. Low-cost techniques allow you to visualise the patterns of airflow over your car so that you can actually see the problem areas that need improvement.

Uniquely, you're also shown how to measure aerodynamic pressures, so you can determine which body surfaces are creating lift, drag and downforce. Want to work out where a wing should be placed? On-road testing to find that out is covered as well. The book also shows you how to measure downforce to see if that wing is actually working! If you wish to reduce drag, more than ten different areas are covered.

Reducing frontal area, lowering cooling system drag, optimising vehicle ride height and rake, reducing the strength of the wake, achieving clean airflow separation and optimising wheel designs - they're all covered using the latest research findings. And if you're a performance driver, there's a major chapter devoted to reducing lift and improving stability. This chapter includes the design and development of

undertrays and diffusers, wings and spoilers. The example car developed measurable downforce when fitted with an undertray and rear diffuser, something that transformed its on-road handling. The author has been writing about the aerodynamics of road cars for more than 25 years. He is also an experienced and proficient car modifier who has performed numerous aerodynamic modifications and upgrades to his own cars. The book's technical consultant, RH Barnard, is an acknowledged world leading automotive aerodynamicist. If you want a practical, hands-on guide that demystifies and explains car aerodynamics, and shows you how to make effective aerodynamic modifications to your car, this book is for you.

Leadbelly Mar 18 2022 Jason Moran was in his blue Mitsubishi van when he was gunned down with his friend, Pasquale Bardora, in front of up to 250 people in the car park of the Cross Keys Hotel. At least five children, including Moran's twin girl and boy, aged six, and his brother's own fatherless children were in the van when the gunman fired. While murdering two men in front of hundreds of people might, at first, seem wreckless, to the killer, it made perfect sense...'

From the authors that brought you Mark Bradon Read's Chopper, comes a true account of the most bloodcurdling gang violence you will ever read. For the last ten years a war has raged on once safe suburban streets that has stunned the world. The killings have been particularly callous and brutal: mothers gunned down with their babies sleeping beside them, fathers killed in front of their children and couples shot down in cold blood. This is true crime at its most bloody, surreal and terrifying.

Bought by the American giant General Motors, the company entered the era of mass production and, with the addition of Bedford trucks and vans, became one of the top five UK producers. the streets as an underworld standover man and executioner. He was released from Pentridge Prison in 1991 and became a bestselling author with his autobiography *Chopper: From the Inside*. Chopper's adventures, however, were far from over. The smart money said that Chopper would be the first to go in any underworld war

but the smart money was wrong. He vowed to outlive his enemies and write their epitaphs and he did so, predicting who would be killed long before the assassins' guns were loaded. Only Chopper would live to tell the tale, with *Last Man Standing* the final instalment of his series of morbidly funny and often brutal memoirs.
