Thought: A Very Short Introduction Oct 07 2020 There is no denying that thinking comes naturally to human beings. But what are thoughts? How is thought realized in the brain? Does thinking occur in public or is it a purely private affair? Do young children and non-human animals think? Is human thought the same everywhere, or are there culturally specific modes of thought? What is the relationship between thought and language? What kind of responsibility do we have for our thoughts? In this compelling Very Short Introduction, Tim Bayne looks at the nature of thought. Beginning with questions about what thought is and what distinguishes it from other kinds of mental states, he goes on to examine various interpretations of thought from philosophy, psychology, neuroscience, and anthropology. By exploring the logical structures of thought and the relationship between thought and other mental phenomena, as well as the mechanisms that make thought possible and the cultural variations that may exist in our thought processes, Bayne looks at what we know - and don't know - about our great capacity for thought. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. The papers contained in this volume, based on a session conducted at the 2010 Theoretical Archaeology Conference, take a multi-disciplinary approach to the topic, addressing such issues as the cultural conception of disease; the impact of gender roles on healing strategies; the possibilities afforded by syncretism; the relationship between material culture and the body; and the role played by the active agency of the sick.

Time Was Soft There Apr 24 2022 "Some bookstores are filled with stories both inside and outside the bindings. These are places of sanctuary, even redemption---and Jeremy Mercer has found both amid the stacks of Shakespeare & Co." ---Paul Collins, author of *Sixpence House: Lost in a Town of Books* In a small square on the left bank of the Seine, the door to a green-fronted bookshop beckoned. . . . With gangsters on his tail and his meager savings in hand, crime reporter Jeremy Mercer fled Canada in 1999 and ended up in Paris. Broke and almost homeless, he found himself invited to a tea party amongst the riffraff of the timeless Left Bank fantasy known as Shakespeare & Co. In its present incarnation, Shakespeare & Co. has become a destination for writers and readers the world over, trying to reclaim the lost world of literary Paris in the 1920s. Having been inspired by Sylvia Beach's original store, the present owner, George Whitman, invites writers who are down and out in Paris to live and dream amid the bookshelves in return for work. Jeremy Mercer tumbled into this literary rabbit hole and found a life of camaraderie with the other eccentric residents, and became, for a time, George Whitman's confidante and right-hand man. *Time Was Soft There* is one of the great stories of bohemian Paris and recalls the work of many writers who were bewitched by the City of Light in their youth. Jeremy's comrades include Simon, the eccentric British poet who refuses to give up his bed in the antiquarian book room, beautiful blonde Pia, who contributes the elegant spirit of Parisian couture to the store, the handsome American Kurt, who flirts with beautiful women looking for copies of *Tropic of Cancer*, and George himself, the man who holds the key to it all. As *Time Was Soft There* winds in and around the streets of Paris, the staff fall in and out of love, straighten bookshelves, host tea parties, drink in the more down-at-the-heels cafés, sell a few books, and help George find a way to keep his endangered bookstore open. Spend a few days with Jeremy Mercer at 37 Rue de la Bucherie, and discover the bohemian world of Paris that still bustles in the shadow of Notre Dame.

"Jeremy Mercer has captured Shakespeare & Co. and its complicated owner, George Whitman, with remarkable insight. *Time Was Soft There* is a charming memoir about living in Whitman's Shakespeare & Co. and the strange, broken, lost, and occasionally talented, eccentrics and residents of this Tumblewood Hotel." ---Noel Riley Fitch, author of *Sylvia Beach and the Lost Generation: A History of Literary Paris in the Twenties & Thirties* "There does seem to be something about the odd ducks that work at bookstores. Jeremy Mercer has captured the story of a wonderful, unique store that could only be born out of a love for books and the written word." --- Liz Schlegel, the Book Revue bookshop, Huntington, New York

Internet, Society and Culture Nov 27 2019 The internet has changed the way we communicate and so changed society and culture. *Internet, Society, and Culture* offers an understanding of this change by examining two case studies of pre and post internet communication. The first case study is of letters sent to and from Australia in 1835-1858 and the second is a study of online gaming. In both case studies, the focus is on the ways communication is created. The result is the definition of two types of communication that are lived simultaneously in the twenty-first century. One type of communication is from before the internet and relies on the body having touched and created a message--for example, by attaching signature--to stabilise the nature of sender, message and receiver. Internet-dependant communication is different because no identity-marker can be trusted on the internet and so individuals' styles of communicating are used to stabilise the transmission of messages. Being after the internet means having to live these two contradictory forms of communication.

Physico-Chemical Properties of Selected Anionic, Cationic and Nonionic Surfactants Aug 05 2020 The number of physico-chemical investigations of surfactants in solution, whether aqueous or nonaqueous, has dramatically increased in recent years. However, literature reports on surfactants in solutions are scattered over a plethora of scientific journals and books which differ widely in scope and readership. Such data are often difficult to retrieve because there have been no systematic compilations, with the exception of those for CMCs and for micelle aggregation numbers. The present compilation meets that need by covering, as completely as possible, the physico-chemical properties of selected series of homologous surfactants. These surfactants are in most cases isomerically pure, are well-known, and have been used in numerous academic and industrial studies. The properties include aggregation number, cloud point, CMC, 13C-NMR, correlation length, counterion binding, density, enthalpy of micelle formation, entropy of micelle formation, Gibbs' free energy of micelle formation, head group area, 1H-NMR, hydration number, Krafft temperature, melting point, micelle radius, microscopic viscosity, miscibility curve, partial molar volume, phase inversion temperature, refractive index, self-diffusion coefficient, surface tension, and upper critical temperature. The book also contains two- and three-component phase diagrams of many nonionic surfactants. The solvent is water in most cases; however, some data refer to properties in D2O, electrolyte solutions, and nonaqueous solvents. The variables are temperature and concentration. Where possible, the method of measurement is given. Data on the purity of the compounds and the accuracy of the measurement methods are not included, as these can easily be found in the original sources, which mostly date from the period 1970-1991 and are given at the end of each chapter. The Index section contains a compound index, a property index, a symbol index and a cross index which facilitate easy access to the data. This valuable collection of data will be of great use to anyone involved in Colloid and Surface Science, academics as well as industrial workers, and will stimulate further work.

Ripper." A junior associate in an Oregon law firm, Brad Miller is stunned by the death row revelations of convicted serial killer Clarence Little. Though Little accepts responsibility for a string of gruesome murders, he swears he was framed for one of them: the death of a teenaged babysitter who worked for then-governor Farrington.
