The "climate generation"—late millennials and iGen, or Generation Z—is demanding that policy makers and government leaders take immediate action to address the dire outcomes predicted by climate science. Those inheriting our planet's environmental problems expect to encounter challenges, but they may not have the skills to grapple with the feelings of powerlessness and despair that may arise when they confront this seemingly intractable situation. Drawing on a decade of experience leading and teaching in college environmental studies programs, Sarah Jaquette Ray has created an "existential tool kit" for the climate generation. Combining insights from psychology, sociology, social movements, mindfulness, and the environmental humanities, Ray explains why and how we need to let go of eco-guilt, resist burnout, and cultivate resilience while advocating for climate justice. **A Field Guide to Climate Anxiety** is the essential guidebook for the climate generation—and perhaps the rest of us—as we confront the greatest environmental threat of our

time.

**4th Generation Warfare Handbook** Jun 02 2020 Written by the author of the Maneuver Warfare Handbook and an active-duty USMC officer with experience in Iraq, 4th Generation Warfare Handbook is the doctrine for a new generation of war. Over the last 40 years, the world has gradually entered into a post-Clausewitzian state where the wars are undeclared, the battlefields can be anywhere, the uniforms are optional, and the combatants as well as the targets are often "civilian." Conventional militaries have repeatedly attempted to utilize technology to meet the new challenges posed, but even the most advanced technology has provided little more than meaningless short-term victories rendered futile in months, if not weeks. This inability of Western governments and militaries to come to terms with the changing nature of modern warfare has led to failed interventions, failed occupations, and now even failed states everywhere from Eastern Europe to Africa, Asia, and the Middle East. And with the recent mass movement of peoples around the world, 4th Generation Warfare can be safely expected to appear in Western Europe and the United States before long. Drawing on their decades of experience with military history and military action, the authors have distilled 4GW theory into a short, concise, easily accessible handbook that provides the soldier, the military analyst, and the civilian observer with a guide to understanding and responding to the changing realities of this challenging new form of war.

**Risk** Nov 07 2020 From the bestselling author of Team of Teams and My Share of the Task, an entirely new way to understand risk and master the unknown. Retired four-star general Stan McChrystal has lived a life associated with the deadly risks of combat. From his first day at West Point, to his years in Afghanistan, to his efforts helping business leaders navigate a global pandemic, McChrystal has seen how individuals and organizations fail to mitigate risk. Why? Because they focus on the probability of something happening instead of the interface by which it can be managed. In this new book, General McChrystal offers a battle-tested system for detecting and responding to risk. Instead of defining risk as a force to predict, McChrystal and coauthor Anna Butrico show that there are in fact ten dimensions of control we can adjust at any given time. By closely monitoring these controls, we can maintain a healthy Risk Immune System that allows us to effectively anticipate, identify, analyze, and act upon the ever-present possibility that things will not go as planned. Drawing on examples ranging from military history to the business world, and offering practical exercises to improve preparedness, McChrystal illustrates how these ten factors are always in effect, and how by considering them, individuals and organizations can exert mastery over every conceivable sort of risk that they might face. We may not be able to see the future, but with McChrystal's hard-won guidance, we can improve our resistance and build a strong defense against what we know—and what we don't.
