District Nursing Manual of Clinical Procedures Jun 19 2019 "This manual, the first of its kind focused on district nursing, provides the means to build competence and confidence in nurses new to the community, or developing their skills. The comprehensive and evidence-based content provides essential information for competence in key areas of district nursing." —From the Foreword, by Rosemary Cook CBE, Hon D Lett, MSc, PG Dip, RGN Director, The Queen's Nursing Institute Clinical skills are a fundamental aspect of district nursing care. The District Nursing Manual of Clinical Procedures is a practical, evidence-based

manual of clinical skills which reflects the unique challenges of district nursing care within the patient's home. It provides a comprehensive resource for all district nurses, community nurses, students and healthcare professionals involved in the district nursing team, enabling them to practice competently and confidently and deliver clinically effective, person-centred care. The District Nursing Manual of Clinical Procedures addresses the complexity of district nursing care and encompasses key aspects of clinical practice, including decision making in areas that district and community nurses often struggle with or find difficult when they are on their own in a patient's home. It utilises the latest clinical research and expert clinical knowledge to address these challenges, and to provide the underlying theory and evidence for district nursing care. Key features Evidence-based manual of practical clinical skills in district nursing care Clear, user-friendly and easy to understand Contains recommendations for expert care within a patient's own home Addresses key concerns of district and community nurses working on their own within a patient's home Encompasses key aspects of district nursing care Placed in the context of person-centred care All procedures include the rationale for each action - 'why' as well as 'how' This title is also available as a mobile App from MedHand Mobile Libraries. Manual of Critical Care Nursing - E-Book Mar 09 2021 It's the ideal go-to reference for the clinical setting! Compact and easy to use, Manual of Critical Care Nursing, 6th Edition presents essential information on approximately 80 disorders and conditions, as well as concepts relevant to caring for all critically ill patients and functioning in the critical care environment. Award-winning clinical nurse specialists Marianne Baird and Sue Bethel separate the content first by body system and then by disorder, with each disorder including a brief description of pathophysiology, assessment, diagnostic testing, collaborative management, nursing diagnoses, desired outcomes, nursing interventions, and patient teaching and rehabilitation. A concise format presents the material in a way that reflects a practicing nurse's thought processes. Coverage of approximately 80 critical care conditions/disorders includes those most commonly seen in critical care units. Chapter

outlines provide easy access to disorders. A portable size makes it ideal for use in the unit or bedside, and is also easy to carry on campus. Unique! Gerontology icon highlights considerations relating to the care of older adults. Unique! Research briefs in special boxes discuss selected research studies for evidence-based patient care. Unique! The latest NANDA-approved nursing diagnoses increase familiarity with NANDA terminology. Appendixes provide quick reference to information needed in the critical care setting. Revised format mirrors a practicing nurse's approach to patient care, making it easier to find information. Newly formatted care plans incorporate diagnoses, interventions, and desired outcomes in a consistent, logical organization. Patient safety alerts and high alerts call attention to issues important to a patient's safety. Unique! Diagnostic Tests tables highlight the definition, purpose, and abnormal findings for each test. Unique! Collaborative Management tables concisely summarize key points while incorporating nationally recognized guidelines. Colored tabs mark the location of each body system, making topics easier to find. Smaller trim size increases portability for use in the unit or bedside, while enhancing readability.

Care of People with Diabetes Feb 08 2021

Diabetes Mellitus is a chronic disease affecting a large percentage of the population world-wide. In the UK alone there are over 1.4 million people diagnosed with diabetes, a new diagnosis of type 2 diabetes is made every five minutes, and as many as a million people are suspected to have the condition without knowing it. As many as one in ten patients in hospital have diabetes and diabetes accounts for almost a tenth of NHS spending, largely due to the high costs of complications such as heart disease, blindness, kidney disease, stroke, and amputation which all require specialist nursing care. This manual is an essential guide to the care and management of people with diabetes mellitus, aimed at nurses and healthcare professionals, and written by an experienced clinical nurse specialist with extensive knowledge of evidence-based diabetes care. This revised and updated second edition of *Care of People with Diabetes* serves as an essential companion to clinical practice with a particular emphasis on the acute care setting. Detailed information is included on the underlying pathophysiology and types of diabetes, assessment and management of diabetes, formulating care plans, and patient instruction. New chapters are included on sexual health, older people, and complementary

Manual for Radiation Oncology Nursing

Practice and Education Aug 22 2019

"Advances in technology, research, and evidence-based practice have led to improvements in the care of patients receiving radiation therapy. The knowledge and expertise required by nurses must focus on the needs of patients who come into their care at any point across the trajectory of the cancer journey. Nurses may work with patients at varying stages of the radiation therapy process and in a wide range of settings. Regardless, however, the need to be knowledgeable about the symptoms and side effects associated with this treatment is essential for nurses caring for this patient population. The Oncology Nursing Society has published the fifth edition of *Manual for Radiation Oncology Nursing Practice and Education* to support nurses who care for patients who will receive, are receiving, or have received radiation therapy. The fifth edition features significant updates and changes to the content to reflect advances in technology, treatment options, and symptom management. New sections have been added based on input from radiation oncology nurses or as a result of changes in treatment options, the needs of specific patient populations, and observations from clinical practice. New topics include patients with cognitive changes and dementia; general distress and coping; patients

with mental illness; special populations, such as women who are pregnant, ado-lescents, and young adults; special needs related to late effects of treatment and cardiac toxicities; and treatment modalities, including cobalt therapy and immunotherapy. This manual serves as an essential resource for individual nurses new to working in a radiation therapy setting as well as to nurses wanting to advance their knowledge in radiation biology and protection, diverse radiation therapy modalities, combination treatments, site- or disease-specific concerns, symptom management, special populations, and care during transition points. Additionally, this manual can be a resource to advanced practice clinicians, educators, and administrators, with a focus on support for nursing staff seeking the education and skills required to care for patients receiving radiation therapy and their families"--

"Caring for the older adult population is a challenge and the goal of nursing practice is to help preserve or restore an older adult's function and maximize their well-being and quality of life. This book is a wonderful resource for assisted living clinicians and nurses who wish to serve this population. It is well written, easy to read, and well organized so it can be used as a textbook for nursing

students in geriatric nursing." Score: 94, 4 stars --Doody's "This book, written by and for nurses across the spectrum of nurse providers (advanced practice nurses, delegating nurses, and the direct care workforce), covers all aspects of management as well as the many common clinical problems and syndromes we encounter among older adults. Further, this book proposes wonderful assessment and intervention material that will help the entire health care team keep residents within their AL communities through early recognition and management of acute illnesses. Kudos to our nursing colleagues for editing this publication and may it serve as the useful guide for AL residents across the country." --John B. Murphy, MD President, American Geriatrics Society Professor of Medicine and Family Medicine Warren Alpert Medical School of Brown University This book provides a comprehensive overview of both management activities and clinical competencies for assisted living nurses. The authors provide practical guidelines and decision-making models to help nurses address both the large- and small-scale challenges of their daily practice. With Assisted Living Nursing, readers can gain the essential problem-solving and task management skills critical to their daily work. The contributors cover a wide range of topics, including: Management Ethics in nursing practice Regulatory oversight and reimbursement Organizational culture Leadership theories and styles Conflict resolution Finance and budget
