The Automatic Packaging Machinery Sector in Italy and Germany Nov 22 2019 This book analyzes the wrapping and packaging machinery sector in the Emilia/Bologna district in Italy and compares the most recent trends with those in the industry in Schwäbisch Hall and Waiblingen,

Baden-Württemberg, Germany, which represents a direct rival. In a detailed and original study, the authors trace the evolution of manufacturing in Bologna during a period that witnessed extraordinary growth in automatic wrapping and packaging machines, leading the sector to become a central pillar of Italian mechanical engineering. Similarly, the history of the industry in the Emilia district is described, highlighting the factors that led to its success. A comprehensive comparative analysis of the German and Italian sectors is then performed. Export figures and the trade balance for the sector are examined based on Eurostat data, and the significance of the two districts in terms of global trade is identified with reference to UN data. In addition, the number of companies, sales, and the size of the workforces are thoroughly compared. The book will be of interest to economists and others with an interest in the development and importance of the automatic packaging machinery sector.

A-Z of Italian Motorcycle Manufacturers Feb 18 2022 Italian motorcycles have a place in history – and many enthusiasts' hearts – out of all proportion to the numbers that have been built. From Moto Guzzi becoming the first non-British marque to win a TT through to Ducati's achievements in MotoGP, they have also been at the forefront of motorsport despite being far smaller than, at

first, the British and later the Japanese manufacturers. If the number of motorcycles built by Italian manufacturers is small, the sheer number of Italian motorcycle factories will surprise readers. Almost 600 marques were identified in researching this book, and there may have been thousands. This is partly because there were so many engines available off the shelf – many of them English – as well as a thriving accessory and component industry. A–Z of Italian Motorcycle Manufacturers only deals briefly with the grand marques Ducati and Moto Guzzi because there have been many dedicated books about them. Instead this is a definitive guide to the factories that have been less widely covered or, in most cases, never before in the English language. Some, such as Bianchi and Garelli, might be familiar: others, remembered for their racing achievements or uniqueness, such as Morbidelli, and many you may have never heard of. But if it was possible to establish when and where the factories were active, and at least a little about the motorcycles they built, then there is an entry for them. An appendix lists the other manufacturers that are lesser known, making this the most complete reference book of Italian motorcycles available today. This book is a complete guide to Italian motorcycle manufacturers, and an essential reference for anyone with an interest in these fascinating vehicles.
