speed and velocity physics
classroom Aug 27 2022 recall
from unit 1 of the physics
classroom that speed and
velocity refer to two distinctly
different quantities speed is a
scalar quantity and velocity is a
vector quantity velocity being a
vector has both a magnitude
and a direction the magnitude
of the velocity vector is the
instantaneous speed of the
object

physics tutorial the speed of sound physics classroom

Sep 28 2022 the speed of a sound wave refers to how fast a sound wave is passed from particle to particle through a medium the speed of a sound wave in air depends upon the properties of the air primarily the temperature sound travels faster in solids than it does in liquids sound travels slowest in gases such as air the speed of sound can be calculated as the distance per time
