**Compensation Schemes for Damages Caused by Healthcare and Alternatives to Court Proceedings** Jun 30 2020 The book discusses compensation mechanisms and other non-judicial means that offer alternatives to court proceedings, designed and provided for within national legal regimes. Such schemes

are primarily of a civil or administrative character and are mainly intended to supplement criminal liability for medical negligence. As such, the book focuses on medical malpractice and prospective medical harm from a civil law perspective. It examines the contemporary perspective of a patient-physician relationship, which has evolved from

a relation of a quasi-patrimonial character into a partnership of quasi-equal parties, dealing with a medical treatment procedure as a scientific endeavor. It also reviews the extra-legal conditions that are taken into account in compensation arrangements, particularly the need to satisfy a psychological urge for conciliation and empathy on the part of medical

personnel. Lastly, the book explores the responsibility of public authorities and healthcare providers to guarantee access to healthcare that is of a sufficient quality, based upon standards provided for in international (and European) law.

*From Curing to Caring* Sep 14 2021 I progressi medici degli ultimi decenni hanno trasformato le prospettive per le persone che ancora oggi convivono con l'HIV la cui aspettativa di vita media, se la cura è precoce e continuativa, risulta notevolmente incrementata. Tali rilevanti progressi hanno modificato anche la percezione dello stato di salute che non è più vissuto come una sentenza di morte. Tuttavia l'AIDS è ancora causa di morte nei paesi più poveri del mondo e continua a generare stigma e a produrre esclusione, discriminazione e marginalità sociale un po' ovunque. Inoltre il numero di persone nel mondo che vivono con questa infezione è in aumento da un decennio, anche come conseguenza della riduzione delle informazioni sul tema. Partendo da queste considerazioni, il volume, con l'approccio interdisciplinare che intreccia insieme i contributi di scienziati sociali con quelli di medici e attivisti, si propone l'obiettivo di fare il punto della situazione sulla questione e dibatte sui temi più propriamente legati alle rappresentazioni sociali e culturali di HIV e AIDS oltre che sulla qualità della vita delle persone che ne sono interessate. Il libro è diviso in due parti: la prima sulla costruzione culturale e sociale di HIV/AIDS e la complessità

delle dimensioni della cura, dall'infezione alla presa in carico; la seconda sulle narrative biografiche, con particolare riferimento ad atteggiamenti, informazioni e qualità della vita.

**Data protection in the context of covid-19.**

**A short (hi)story of tracing applications** Jun 11 2021 The volume presents the results of a research project (named "Legafight") funded by the Luxembourg Fond National de la Recherche in order to verify if and how digital tracing applications could be implemented in the Grand-Duchy in order to counter and abate the Covid-19 pandemic. This inevitably brought to a deep comparative overview of the various existing various models, starting from that of the European Union and those put into practice by Belgium, France, Germany and Italy, with attention also to some Anglo-Saxon approaches (the UK and Australia). Not surprisingly the main issue which had to be tackled was that of the protection of the personal data collected through the tracing applications, their use by public health authorities and the trust laid in tracing procedures by citizens. Over the last 18 months tracing apps have registered a rise, a fall, and a sudden rebirth as mediums devoted not so much to collect data, but rather to distribute real time information which should allow informed decisions and be used as repositories of health certifications.

Health Professions and the State in Europe Dec 25 2019 Many professions today are in a state of transition, with changes being imposed on them by governments and other agencies. Focusing on this theme of change *Health Professions and the State in Europe* explains and illuminates the specific relationship between health professions and the state. The editors and contributors, all experts in the field, present an overview of the current situation in eight different countries in Europe, covering such topical issues as the impact on the health professions of market policies, performance and quality measures, and challenges to professional monopolies and expertise. With its international and comparative perspective, the book enhances our understanding of the interplay between health professions and the state in different national contexts.

**Cultures of Plague** Apr 28 2020 This title highlights the impact that the plague epidemic in Italy between 1575 and 1578 had on the medical writers and practitioners of the time. He asserts that these writers anticipated modern epidemiology and created the structure for plague classics of the next century.

**Principios de gestión sanitaria** Jun 18 2019 La eficacia en la asistencia sanitaria no puede quedar disociada de la eficiencia en el empleo de los recursos escasos. Es una afirmación que todo el mundocomparte. Mientras el progreso técnico amplía sin cesar las posibilidades de la medicina, la economía pone un límite a su aplicación indiscriminada. El médico debe ser el verdadero protagonista de una nueva cultura de la gestión sanitaria y sus conocimientos científico-técnicos, aplicables a las enfermedades, deben complementarse con una gestión activa e inteligente para conseguir lo mejor para un mayor número de pacientes. En este contexto, la economía de la salud puede prestar un importante servicio a las empresas sanitarias, en una estrecha conexión entre la medicina y la economía. El autor de este libro ha sabido ofrecer en un lenguaje asequible para todos, el panorama de los nuevos modos en que se están afrontando los problemas sanitarios desde un punto de vista empresarial. ### **Rule of Law, Human Rights and Judicial**

**Control of Power** Jan 26 2020 Judicial control of public power ensures a guarantee of the rule of law. This book addresses the scope and limits of judicial control at the national level, i.e. the control of public authorities, and at the supranational level, i.e. the control of States. It explores the risk of judicial review leading to judicial activism that can threaten the principle of the separation of powers or the legitimate exercise of state powers. It analyzes how national and supranational legal systems have embodied certain mechanisms, such as the principles of reasonableness, proportionality, deference and margin of appreciation, as well as the horizontal effects of human rights that help to determine how far a judge can go. Taking a theoretical and comparative view, the book first examines the conceptual bases of the various control systems and then studies the models, structural elements, and functions of the control instruments in selected countries and regions. It uses country and regional reports as the basis for the comparison of the

convergences and divergences of the implementation of control in certain countries of Europe, Latin America, and Africa. The book's theoretical reflections and comparative investigations provide answers to important questions, such as whether or not there are nascent universal principles concerning the control of public power, how strong the impact of particular legal traditions is, and to what extent international law concepts have had harmonizing and strengthening effects on internal public-power control.

nexus thinking. Even though organic waste composting itself is not a new topic, those who want to start a new project or align an ongoing project with nexus thinking, find it difficult to gather the necessary information. With nine case studies from four continents, this book aims to fill above gap in literature. While current literature on composting is often found to be limited to either soil/agriculture sector or waste management sector, this book presents a combined point of view. This open access book starts with an introductory chapter that describes the need to bring the waste management aspects and soil nutrient management aspects of compost production into one integrated theme. The relevance of nexus thinking and the Sustainable Development Goals (SDGs) are also presented in this introduction. The first three chapters after the introduction covers composting from the solid waste management and its policy aspects, taking examples from three developing countries. The next three examples are mostly about the benefits composting can provide to the soil and agriculture. These examples are also from three developing countries, but with a mixture of urban as well as rural settings. Last three chapters present more insight into the latest developments taking examples from Europe, as well as new methods adapted from the traditional styles from Africa.

**Nursing Outcomes Classification (NOC)** Aug 13 2021 Nursing Outcomes Classification (NOC) presents standardized terminology and measures for nursing-sensitive patient outcomes that result from nursing interventions. Developed by a research team at the University of Iowa, the classification can be used by clinicians, students, educators, researchers, and administrators in a variety of clinical, educational, and research venues. The comprehensiveness of the outcomes, and the inclusion of specific indicators that can be used to evaluate and rate the patient in relation to outcome achievement, make this book an invaluable resource for both practicing nurses and students. Includes 330 research-based outcome labels to provide standardization of expected patient outcomes. Presents for each outcome: a definition, list of indicators, and

measures to facilitate clinical implementation. Provides links between NOC outcomes and NANDA nursing diagnoses to promote clinical decision making. Organizes NOC outcomes into a conceptual framework using a coded taxonomy to facilitate locating an outcome. Includes examples of implementation in practice and educational settings. Provides linkages with Gordon's Functional Health Patterns. 76 newly approved outcomes: 70 for individual patients and family caregivers, 3 family-level outcomes, and 3 community-level outcomes. Research results from 10 clinical sites testing the reliability and validity of the outcomes. Expanded content covering community settings, reflecting the shift in health care delivery. Core Outcomes for Nursing Specialty Areas featuring core

interventions for 41 nursing specialties. An additional column in the Outcomes section measurement scale with N/A to help nurses document the specific outcome indicators that do not apply to their patient.

**The Changing Administrative Law of an EU Member State**

Dec 17 2021 This book presents the evolution of Italian administrative law in the context of the EU, describing its distinctive features and comparing it with other

experiences across Europe. It provides a comprehensive overview of administrative law in Italy, focusing on the main changes occurred over the last few decades. Although the respective chapters generally pursue a legal approach, they also consider the influence of economic, social, cultural and technological factors on the evolution of public administration and administrative law. The book is divided into three parts. The first part addresses general issues (e.g. procedures and organization of public administrations, administrative justice). The second part focuses on more specific topics (e.g. public intervention in the economy, healthcare management, local government). In the third part, the evolution of Italian administrative law is discussed in a comparative perspective.
