Elements of MECHANICAL ENGINEERING Sep 22 2019 This book provides a comprehensive and wide-ranging introduction to the fundamental principles of mechanical engineering in a distinct and clear manner. The book is intended for a core introductory course in the area of foundations and applications of mechanical engineering, prescribed for the first-year students of all disciplines of engineering. The book develops an intuitive understanding of the basic principles of thermodynamics as well as of the principles governing the conversion of heat into energy. Numerous illustrative examples are provided to fortify these concepts throughout. The book gives the students a feel for how thermodynamics is applied in engineering practice in the areas of heat engines, steam boilers, internal combustion engines, refrigeration and air conditioning, and to devices such as turbines, pumps and compressors. The book also provides a basic understanding of mechanical design, illustrating the principles through a discussion of devices designed for the transmission of motion and power such as couplings, clutches and brakes. No book on basic mechanical engineering is complete without an introduction to materials science. The text covers the treatment of the common engineering materials, highlighting their properties and applications. Finally, the role of lubrication and lubricants in reducing the wear and tear of parts in mechanical systems, is lucidly explained in the concluding chapter. The text features several fully worked-out examples, a fairly large number of numerical problems with answers, end-of-chapter review questions and multiple choice questions, which all enhance the value of the text to the students. Besides the students studying for an engineering degree, this book is also suitable for study by the students of AMIE and the students of diploma level courses.

Business Regulatory Framework B.Com 3rd Semester Syllabus Prescribed by National Education Policy Sep 27 2022 THE INDIAN CONTRACT ACT, 1872 LAW OF CONTRACT: 1. Nature of Contract 2. Offer and Acceptance 3. Consideration 25—33 4. Capacity of Parties 5. Free Consent 6. Legality of Object 7. Void Agreements 8. Contingent Contracts 9. Performance of Contract 10. Discharge of Contract 11. Quasi-Contracts 12. Remedies for Breach of Contract SPECIAL CONTRACTS: 13. Indemnity and Guarantee 14. Bailment and Pledge 15. Principal and Agent THE SALE OF GOODS ACT, 1930: 16. Contract of Sale of Goods 17. Conditions and Warranties 18. Transfer of Property or Ownership 19. Performance of Contract of Sale 20. Remedial Measures THE NEGOTIABLE INSTRUMENTS ACT, 1881: 21. Negotiable Instruments 22. Parties to a Negotiable Instrument 23. Negotiation 24. Presentment and Dishonour of Negotiable Instruments 25. Discharge of Negotiable Instruments 26. Hundis 27. Banker and Customer

Teaching Languages and Cultures Mar 09 2021 This volume offers diverse perspectives on language and culture teaching explored against the background of a fast-paced globalized world of increased mobility and opportunity. While teachers are pressed to reinvent and adapt the existing teaching practices, researchers are invited to conduct

studies with a view of implementing the findings in the classroom practice. This collection presents discussions of different aspects of foreign language instruction, language skills and learning strategies, and foreign languages in professional contexts, as well as the role of intercultural competence in language teaching and teacher education. Offering insights into a variety of foreign language and culture teaching contexts throughout Europe, this volume will be of interest to researchers and practitioners in applied linguistics and language and culture teaching methodology, including both experienced and novice language teachers, in the Balkan region and beyond.

Arihant ICSE History & Civics Semester 2 Class 10 for 2022 Exam Jan 07 2021 With the introduction National Education Policy 2020, Indian Education System has taken step forward in smart learning. The Council for the Indian School Certificate Examination has also introduced two Semester exam pattern for Both ICSE & ISC Boards. After getting a good share of success with CBSE TERM 1 & 2 Books, Arihant has finally tried to enter into the zone of CISCE's modified plan for Assessment, giving complete study & practice. Here's presenting ICSE Series of Semester-II giving complete emphasize on the rationalize syllabus for classes 9th to 12th. The all new "ICSE Semester II – History & Civics" of Class 10 provide complete explanation and guidance to the second half of the syllabus required. This book covers all the chapters as prescribed in Semester II by the board in a Complete & Comprehensive manner. Covering the second half of the syllabus, this book consists of: 1. Complete theory in each chapter all the topics 2. Objective & Subjective Type question each chapter 3. Coverage of Past Exams' Question 4. Complete & Detailed explanation for each question 5. 3 Practice Papers based on Semester II Syllabus TOC
CIVICS: Unit -2: The Union Executive – The Union Executive: The President and The Vice President, The Prime Minister and the Council of Minister, Unit -3: The Judiciary – The Supreme Court, The High Courts and The Subordinate Courts, HISTORY: Unit 3: The Contemporary World – The World War, The Rise of Dictatorship and The Second World War, The United Nations and its Major Agencies, The Non Alignment Moment, Practice Sets (1-3)

A Practical Book of Pharmaceutical Organic Chemistry-II Oct 04 2020 This book, "A Practical Book of Pharmaceutical Organic Chemistry-II," was written by 07 different authors in accordance with the B.Pharm third-semester PCI curriculum. The primary purpose of this book is to provide readily accessible methods and procedures for conducting pharmaceutical Organic chemistry practicals in the 3rd semester of B. Pharm, with a focus on facilitating subject comprehension. It contains 17 experiments based strictly on the PCI curriculum containing introductory part on Recrystallisation and Steam distillation technique, following by experimental procedures of various organic compounds mentioned in the PCI Syllbus "

Computational Collective Intelligence -- Technologies and Applications Jul 21 2019 This book constitutes the refereed proceedings of the 6th International Conference on Collective Intelligence, ICCCI 2014, held in Seoul, Korea, in September 2014. The 70 full papers presented were carefully reviewed and selected from 205 submissions. They address topics such as knowledge integration, data mining for collective processing, fuzzy, modal and collective systems, nature inspired systems, language processing systems, social networks and semantic web, agent and multi-agent systems, classification and clustering methods, multi-dimensional data processing, Web systems, intelligent decision making, methods for scheduling, image and video processing, collective intelligence in web systems, computational swarm intelligence, cooperation and collective knowledge.

Applied Calculus Apr 29 2020

Zoology for Degree Students (For B.Sc. Hons. 3rd Semester, As per CBCS) Jan 19 2022 This textbook has been designed to meet the needs of B.Sc. (Hons.) Third Semester students of Zoology as per the new UGC Model Curriculum - Choice Based Credit System (CBCS). Comprehensively written, it explains the essential principles, processes and methodology of Chordata, Physiology and Biochemistry. This textbook is profusely illustrated with well-drawn labelled diagrams, not only to supplement the descriptions, but also for sound understanding of the concepts.

Practical Lab Manual of Pharmaceutical Organic Chemistry - II Feb 26 2020

Construction Technology Oct 16 2021 The second edition of Construction Technology: Analysis and Choice has been expanded to include commercial buildings. This now covers, in a single textbook, all the basic forms of construction studied on professional courses. The book takes as its theme the process of choice: what the expert has to know and how he/she might think through the decisions to be made about the design, production, maintenance and disposal of buildings. It is written with the conviction that by focusing on the process of choice, the range of theory and knowledge that is useful to practice becomes explicit, making the link between knowledge and practice, and between understanding and experience. The new edition has been updated throughout with extensive additions to Chapter 13: Manufacture and Assembly and to Chapter 15: Sustainability. An entire new section has been added, covering all the main elements of commercial construction. Students will find here explanations of how environments, structural behaviour, production know-how, cost and social concerns such as sustainability can be taken into account in the choice of construction. They will also gain a clear understanding of the construction details and specifications adopted for both housing and commercial buildings in the UK at the beginning of the 21st century. Provides a framework to think through proposed solutions Sets the choice of solution in both time and place, and in the context of sustainability Focuses on key questions: will the proposal fail; and can it be built? Considers a building's response to loading, environmental conditions and time Looks at the production process as manufacture and assembly Book website at www.wiley.com/go/bryanconstructiontech2e Contains nearly 200 fully referenced, clear line drawings to download for free, as well as suggested learning activities for lecturers to incorporate into their teaching programmes.

Analog Electronic Circuits (For 3rd Semester of APJKTU, Kerala) Aug 26 2022 Analog Electronic Circuits
Computer Organization Sep 15 2021

British and American Drama (English) For B.A. (Sem.3) According to NEP-2020 May 11 2021 Contents: 1. Drama : Elements and Types 2. Literary Terms (Drama) 3. Othello (By William Shakespeare) 4. Macbeth (By William Shakespeare) 5. Arms And The Man (By George Bernard Shaw) 6. She Stoops To Conquer (By Oliver Goldsmith) 7. Look Back In Anger (By John Osborne) 8. Murder In The Cathedral (By T. S. Eliot) 9. A Street Car Named Desire (By Tennessee Williams) 10. The Glass Menagerie (By Tennessee Williams) 11. All My Sons (By Arthur Miller). Additional Information: The author of this book is R. Bansal.

Engineering Chemistry I (WBUT), 3rd Edition Jun 12 2021 Engineering Chemistry I has been primarily written for first year B.Tech students but can also be used by BSc and MSc students to clarify their fundamental knowledge. The book begins with the basic theories of chemistry in various disciplines in order to provide a necessary background for dealing with a number of different physiochemical phenomena. Key Features 1. Brief discussion of the concepts 2. Coverage of syllabus in totality 3. Examination-oriented approach 4. Large number of solved problems 5. Solution to previous year's question papers 6. Exercises at the end of each chapter

Company Law B.Com 3rd Semester Syllabus Prescribed by National Education Policy Oct 28 2022 1. MEANING AND NATURE OF A COMPANY 2. KINDS OF COMPANIES 3. PROMOTION AND INCORPORATION OF A COMPANY 4. MEMORANDUM OF ASSOCIATION 5. ARTICLES OF ASSOCIATION 6. PROSPECTUS AND ALLOTMENT OF SHARES 7. SHARES AND SHARE CAPITAL 8. MEMBERSHIP OF A COMPANY 9. BORROWING POWERS, DEBENTURES, PUBLIC DEPOSITS, REGISTRATION OF MORTGAGES AND CHARGES 10. TRANSFER AND TRANSMISSION OF SHARES 11. DECLARATION AND PAYMENT OF DIVIDEND 12. APPOINTMENT AND QUALIFICATIONS OF DIRECTORS 13. MEETINGS OF BOARD AND ITS POWERS. 14. MANAGERIAL PERSONNEL 15. COMPANY MEETING: ANNUAL GENERAL MEETING 16. MAJORITY POWERS AND MINORITY RIGHTS 17. PREVENTION OF OPPRESSION AND MISMANAGEMENT 18. WINDING UP OF A COMPANY

Hues Class 3, Semester 1 Dec 06 2020 1. An integrated semester series for Classes 1 to 5, comprising two semester

books for each class. 2. The books are mapped to the National Curriculum Framework. 3. The series focus on developing the 21st century skills of critical thinking, creativity, communication and collaboration through reading texts that are value-centric, as well as activities, exercises and projects that develop life skills along with application and analytical thinking. 4. The subjects included in Classes 1 & 2 (Semester 1 and 2) are English, Mathematics, Environmental Studies (EVS) and General Knowledge 5. The subjects included in Classes 3 to 5 (Semester 1 and 2) are English, Mathematics, Science, Social Studies and General Knowledge
Bulletin Sep 03 2020

The Design of Future Educational Interfaces Aug 02 2020 The Design of Future Educational Interfaces provides a new multidisciplinary synthesis of educational interface research. It explains how computer interfaces can be redesigned to better support our ability to produce ideas, think, and solve problems successfully in national priority areas such as science and mathematics. Based on first-hand research experience, the author offers a candid analysis of emerging technologies and their impact, highlighting communication interfaces that stimulate thought. The research results will surprise readers and challenge their assumptions about existing technology and its ability to support our performance. In spite of a rapid explosion of interest in educational technologies, there remains a poor understanding of what constitutes an effective educational interface for student cognition and learning. This book provides valuable insights into why recent large-scale evaluations of existing educational technologies have frequently not shown demonstrable improvements in student performance. The research presented here is grounded in cognitive science and experimental psychology, linguistic science and communications, cross-cultural cognition and language, computer science and human interface design, and the learning sciences and educational technology.
Courses on Latin America in Institutions of Higher Education in the United States Feb 20 2022

Fundamentals of Power Electronics Aug 22 2019 Fundamentals of Power Electronics, Second Edition, is an up-to-date and authoritative text and reference book on power electronics. This new edition retains the original objective and philosophy of focusing on the fundamental principles, models, and technical requirements needed for designing practical power electronic systems while adding a wealth of new material. Improved features of this new edition include: A new chapter on input filters, showing how to design single and multiple section filters; Major revisions of material on averaged switch modeling, low-harmonic rectifiers, and the chapter on AC modeling of the discontinuous conduction mode; New material on soft switching, active-clamp snubbers, zero-voltage transition full-bridge converter, and auxiliary resonant commutated pole. Also, new sections on design of multiple-winding magnetic and resonant inverter design; Additional appendices on Computer Simulation of Converters using averaged switch modeling, and Middlebrook's Extra Element Theorem, including four tutorial examples; and Expanded treatment of current programmed control with complete results for basic converters, and much more. This edition includes many new examples, illustrations, and exercises to guide students and professionals through the intricacies of power electronics design. Fundamentals of Power Electronics, Second Edition, is intended for use in introductory power electronics courses and related fields for both senior undergraduates and first-year graduate students interested in converter circuits and electronics, control systems, and magnetic and power systems. It will also be an invaluable reference for professionals working in power electronics, power conversion, and analogue and digital electronics.

Basic Engineering Mathematics Volume - II (For 3rd Semester of RGPV, Bhopal) Jul 25 2022 Basic Engineering Mathematics Volume

Handbook for Teaching Introductory Psychology Jul 01 2020 Like its predecessors, Volume III of the Handbook for Teaching Introductory Psychology provides introductory psychology instructors with teaching ideas and activities that can immediately be put into practice in the classroom. It contains an organized collection of articles from Teaching of Psychology (TOP), the official journal of the Society for the Teaching of Psychology, Division 2 of the American Psychological Association. Volume III contains 89 articles from TOP that have not been included in other volumes. Another distinction between this volume and its predecessors is its emphasis on testing and assessment. The book is divided into two sections. Section One, "Issues and Approaches in Teaching Introductory Psychology," contains 52 articles on critical issues, such as: how to approach the course; understanding students' interests, perceptions, and motives; students' existing knowledge of psychology (including their misconceptions); a comparison of introductory textbooks and tips on how to evaluate them; test questions and student factors affecting exam performance; an overview of different forms of feedback; giving extra credit; and how to deal with academic dishonesty. Section Two consists of 37 articles that present demonstrations, class and laboratory projects, and other techniques to enhance teaching and learning in both the introductory, as well as advanced courses in the discipline. This section is organized so as to parallel the order of topics found in most introductory psychology textbooks. Intended for academicians who teach the introductory psychology course and/or oversee grad assistants who teach the course, all royalties of the book go directly to the Society for the Teaching of Psychology to promote its

activities to further improve the teaching of psychology.

Teaching in Nursing E-Book Jul 13 2021 Teaching in Nursing, 4th Edition is the only nursing text to address all three components of education -- teaching, curriculum, and evaluation. Comprehensive guidelines help you meet the day-to-day challenges of teaching, including curriculum development, the diversity of student learning styles, and developing and using classroom tests. This edition has been updated with information on the latest trends in education including new information on the use of simulations to facilitate learning, the latest on competency-based and concept-focused curricula, developing learner-centered courses, and more. Edited by expert nursing educators Diane M. Billings and Judith A. Halstead, Teaching in Nursing is a past winner of the AJN Book of the Year award, and is an excellent resource for nurses preparing to take the Certified Nurse Educator (CNE) Exam. The only nursing resource to cover teaching, curriculum, and evaluation of students -- the three essential components of nursing education. Contributing authors are nationally recognized scholars in their fields of expertise. Models of teaching are used to demonstrate clinical teaching, teaching in interdisciplinary setting, how to evaluate students in the clinical setting, and how to adapt teaching for community-based practice. Teaching strategies promote critical thinking and active learning, including evaluation techniques, lesson planning, and constructing examinations. Evidence-based teaching boxes explain how to practice and apply evidence-based teaching, with implications for faculty development, administration, and the institution. End-of-chapter summaries let you draw conclusions based on the chapter content. Open-ended application questions at the end of each chapter are ideal for faculty-guided discussion and online education. Up-to-date research looks ahead to the needs of the future.
