Power System Modelling and Scripting Dec 24 2019 Power system modelling and scripting is a quite general and ambitious title. Of course, to embrace all existing aspects of power system modelling would lead to an encyclopedia and would be likely an impossible task. Thus, the book focuses on a subset of power system models based on the following assumptions: (i) devices are modelled as a set of nonlinear differential algebraic equations, (ii) all alternate-current devices are operating in three-phase balanced fundamental frequency, and (iii) the time frame of the dynamics of interest ranges from tenths to tens of seconds. These assumptions basically restrict the analysis to transient stability phenomena and generator controls. The modelling step is not self-sufficient. Mathematical models have to be translated into computer programming code in order to be analyzed, understood and "experienced". It is an object of the book to provide a general framework for a power system analysis software tool and hints for filling up this framework with versatile programming code. This book is for all students and researchers that are looking for a quick reference on power system models or need some guidelines for starting the challenging adventure of writing their own code.

Serena Singh Flips the Script Jun 17 2019 "Sonya Lalli's savvy novel puts relationships in all of their forms--family, friends, and romance--on even footing as a young woman works to find happiness."--Shelf Awareness Serena Singh is tired of everyone telling her what she should want--and she is ready to prove to her mother, her sister, and the aunties in her community that a woman does not need domestic bliss to have a happy life. Things are going according to plan for Serena. She's smart, confident, and just got a kick-ass new job at a top advertising firm in Washington, D.C. Even before her younger sister gets married in a big, traditional wedding, Serena knows her own dreams don't include marriage or children. But with her mother constantly encouraging her to be more like her sister, Serena can't understand why her parents refuse to recognize that she and her sister want completely different experiences out of life. A new friendship with her co-worker, Ainsley, comes as a breath of fresh air, challenging Serena's long-held beliefs about the importance of self-reliance. She's been so focused on career success that she's let all of her hobbies and close friendships fall by the wayside. As Serena reconnects with her family and friends--including her ex-boyfriend--she learns letting people in can make her happier than standing all on her own.

Flip the Script Jun 29 2020 THE BESTSELLING AUTHOR OF PITCH ANYTHING IS BACK TO FLIP YOUR ENTIRE APPROACH TO PERSUASION. Is there anything worse than a high-pressure salesperson pushing you to say "yes" (then sign on the dotted line) before you're ready? If there's one lesson Oren Klaff has learned over decades of pitching, presenting, and closing long-shot, high-stakes deals, it's that people are sick of being marketed and sold to. Most of all, they hate being told what to think. The more you push them, the more they resist. What people love, however, is coming up with a great idea on their own, even if it's the idea you were guiding them to have all along. Often, the only way to get someone to sign is to make them feel like they're smarter than you. That's why Oren is throwing out the old playbook on persuasion. Instead, he'll show you a new approach that works on this simple insight: Everyone trusts their own ideas. If, rather than pushing your idea on your buyer, you can guide them to discover it on their own, they'll believe it, trust it, and get excited about it. Then they'll buy in and feel good about the chance to work with you. That might sound easier said than done, but Oren has taught thousands of people how to do it with a series of simple steps that anyone can follow in any situation. And as you'll see in this book, Oren has been in a lot of different situations. He'll show you how he got a billionaire to take him seriously, how he got a venture capital firm to cough up capital, and how he made a skeptical Swiss banker see him as an expert in banking. He'll even show you how to become so compelling that buyers are even more attracted to you than to your product. These days, it's not enough to make a great pitch. To get attention, create trust, and close the deal, you need to flip the script.

A Thousand Splendid Suns (Play Script) Aug 20 2019 The script for the stage production of the bestselling Khaled Hosseini novel A Thousand Splendid Suns, as adapted by playwright Ursula Rani Sarma. Born a generation apart and with very different ideas about love and family, Mariam and Laila are two women brought jarringly together by war, by loss, and by fate. As they endure the ever-escalating dangers around them--in their home, as well as in the streets of Kabul--they come to form a bond that makes them both sisters and mother-daughter to each other, and that will ultimately alter the course not just of their own lives but of the next generation. With heart-wrenching power and suspense, playwright Ursula Rani Sarma reimagines Hosseini's novel to show how a woman's love for her family can move her to shocking and heroic acts of self-sacrifice, and that in the end it is love, or even the memory of love, that is often the key to survival. A stunning accomplishment, this reimagination of A Thousand Splendid Suns is a haunting, heartbreaking, compelling production about unlikely friendship and indestructible love. This adaptation was first performed by the American Conservatory Theater in San Francisco in February 2017.

The Indus Script and the Ṛg-Veda Nov 22 2019 The deciphering of the Indus script has met with suspicion and is exposed to ridicule even. Many people are nowadays of the opinion that the Indus script is altogether indecipherable, if not a bilingual of considerable size turns up. The approach to a decipherment presented in this volume makes avail of a bilingual, too, but its masterkey is the discovering of the symbolic connection of the Indus signs with the metaphoric language of the Rg-Veda. Nearly 200 inscriptions, among them the longest and those with the most interesting motifs, have been decoded here by setting them syllable for syllable in relation to Rg-Vedic verses. The results that were gained by this method for the pictographic values of the Indus signs are surprising and far beyond the possibilities of the most daring phantasy. At the same time many problems of the Rg-Veda could be solved or new insights be won.
