Essentials of WPPSI-IV Assessment Jan 20 2022 Exploit the full potential of the WPPSI-IV with analysis from multiple perspectives Essentials of WPPSI-IV Assessment is a comprehensive guide to administering, scoring, and interpreting the latest edition of the Wechsler Preschool and Primary Scale of Intelligence, which represents a major revision of the prior edition. Step-by-step guidelines walk readers through the process, and new Behind the Scenes boxes provide unprecedented insight into the new subtests and the test development process. The book highlights common errors and complex aspects so readers can avoid them, and includes illustrative case studies based on data collected during the scale's standardization to assist in proper administration and interpretation. Used to evaluate for learning or intellectual disabilities, developmental or language delays, or gifted and talented classification, the Wechsler Preschool and Primary Scale of Intelligence is the most widely used assessment of intelligence for young children. Essentials of WPPSI-IV Assessment applies an interpretive approach that allows flexibility in response to the real constraints and challenges inherent in working with children, describing performance in both normative and interpersonal contexts to facilitate interpretive case formulations from multiple theoretical and clinical perspectives. Topics include: WPPSI-IV administration and clinical applications Scoring, score analysis, and interpretation Strengths and weaknesses of the WPPSI-IV Differences across demographic groups The book provides alternatives for situations in which published comparison scores may not be available or applicable to a particular child, and supplies composite scores aimed at facilitating WPPSI-IV interpretation from a variety of theoretical approaches. Those who employ the WPPSI-IV must have a thorough grasp of the full potential of the tool, and Essentials of WPPSI-IV Assessment contains the insight and information that allow for deeper understanding.

Scoring System Improvements to Three Leadership Predictors Aug 27 2022 "This project sought to examine and improve the reliability of the scoring systems for three instruments which have been used in previous Army leadership research. Review of existing literature and interviews with project staff participating in prior research provided initial information concerning the strengths and weaknesses of the scoring systems for the three instruments. This information was used to recommend modifications to the original scoring systems. Six individuals were trained to use the modified scoring systems. The modified scoring systems were evaluated by rescoring responses randomly selected from the sample which had been scored according to the scoring systems originally developed for the leadership research program. Reliability estimates for the three modified scoring systems were consistently strong and showed improvements over those obtained through the original scoring systems. Interrater agreement indices were significant for nearly all ratings. Validity estimates provided evidence that each modified instrument was moderately to highly correlated with conceptually similar scores generated through the original scoring scheme. The report recommends use of the revised rating systems in future research to improve the quality of measurement from the three predictors."--DTIC.

Adaptive Behavior Assessment System-II Jun 25 2022 **Adaptive Behavior Assessment System-II** summarizes information on adaptive behavior and skills as well as general issues in adaptive behavior assessment with the goal of promoting sound assessment practice during uses, interpretations, and applications of the Adaptive Behavior Assessment System-II. The comprehensive nature of the ABAS-II, ease in administration and scoring, and wide age range have resulted in its widespread use for a large number of assessment purposes. The book provides practical information and thus serves as a valuable resource for those who use the ABAS-II. Assists in the functional use of the ABAS-II Provides case studies illustrating use of the ABAS-II in comprehensive assessment and intervention planning Reviews scholarship on adaptive behaviors and skills Describes legal, ethical, and other professional standards and guidelines that apply to the use of the ABAS-II and other measures of adaptive behavior Discusses the use of the ABAS-II with autism, mental retardation; young children and those in elementary and secondary school; as well as incarcerated persons being evaluated for possible mental retardation

GUIDE TO THE QUALITATIVE SCORING SYSTEM FOR THE MODIFIED VERSION OF THE BENDER-GESTALT TEST Sep 16 2021 With increased interest in predicting and ultimately preventing academic failure in children comes the need for effective preschool and primary school assessment. The first step in developing an effective assessment program is to select tests that will yield data needed for individual decision making. One factor that has been shown to contribute to the prediction of children's academic achievement is visual-motor-integration skill. The Qualitative Scoring System for the Modified Version of the Bender-Gestalt Test was developed in the 1980s to measure visual-motor-integration skill in preschool and early elementary school children. The assessment instrument utilizes six of the nine Bender-Gestalt Test designs, which are copied by the child. It may be administered in either individual or group format. The scoring system involves a six-point scale used to judge the overall quality of each design. Examiners will find the assessment instrument easy to administer, score, and interpret. Further, research has shown that the assessment instrument is a reliable and valid predictor of school achievement. This book will describe the development and refinement of the Qualitative Scoring System for the Modified Version of the Bender-Gestalt Test. In addition, it will provide detailed information and guidelines for administering, scoring, and interpreting the test. Specifically, there are separate chapters on administration and scoring, standardization and norming, reliability and validity, and interpretation. In short, the book contains everything psychologists and educational specialists need to know to use the Qualitative Scoring System for the Modified Version of the Bender-Gestalt Test.

The Crisi Wartegg System (CWS) Jun 01 2020 The Wartegg Drawing Completion Test (WDCT) is a semi-structured, graphic, performance-based personality test, created by Ehrig Wartegg (1939). With a foundation in Gestalt and Psychodynamic theory, the WDCT has been used widely throughout Europe, South America, and Japan, but only recently has become available in the United States. Initial scoring systems for the WDCT were considered cumbersome and lacked research-driven validation. In response to these factors, Alessandro Crisi, following years of clinical practice and research, developed the Crisi Wartegg System (CWS; 1998, 2007), a normed and standardized administration, scoring, and interpretation system for the WDCT. Over the past three decades, Dr. Crisi has refined and expanded the CWS through research, broadening the scope of the measure, and increasing the accessibility of the system to clinicians. This manual provides a comprehensive guide to the CWS, made available to English-speaking clinicians for the first time.

The reader is methodically introduced to the pharmacology of emotive behavior, with emphasis on drug effects in mental and emotional disorders as well as the action of psychotropic drugs on emotions, motivations, and social behavior of animals. The final section is devoted to the pharmacological aspects of the cerebrospinal fluid-transport system. This section covers topics such as the metabolism of biogenic amines in the human CNS; the importance of dopamine metabolism for the clinical effects and side effects of neuroleptics; and composite transport systems for organic acids and bases in choroid plexus. This book will be of interest to scientists representing all the major areas of pharmacology, including clinical pharmacology and toxicology, as well as to internists, psychiatrists, neurologists, and anesthesiologists.

Assessing Adolescent and Adult Intelligence Apr 30 2020 The classic text--now updated with a new interpretive approach to the WAIS?-III Assessing Adolescent and Adult Intelligence, the classic text from Alan Kaufman and Elizabeth Lichtenberger, has consistently provided the most comprehensive source of information on cognitive assessment of adults and adolescents. The newly updated Third Edition provides important enhancements and additions that highlight the latest research and interpretive methods for the WAIS?-

III. Augmenting the traditional "sequential" and "simultaneous" WAIS?-III interpretive methods, the authors present a new approach derived from Cattell-Horn-Carroll (CHC) theory. This approach combines normative assessment (performance relative to age peers) with ipsative assessment (performance relative to the person's own mean level). Following Flanagan and Kaufman's work to develop a similar CHC approach for the WISC?-IV, Kaufman and Lichtenberger have applied this system to the WAIS?-III profile of scores along with integrating recent WAIS?-III literature. Four appendices present the new method in depth. In addition to a detailed description, the authors provide a blank interpretive worksheet to help examiners make the calculations and decisions needed for applying the additional steps of the new system, and norms tables for the new WAIS?-III subtest combinations added in this approach. *Assessing Adolescent and Adult Intelligence* remains the premier resource for the field, covering not only the WAIS?-III but also the WJ III?, the KAIT, and several brief measures of intelligence, as well as laying out a relevant, up-to-date discussion of the discipline. The new, theory-based interpretive approach for the WAIS?-III makes this a vital resource for practicing psychologists, as well as a comprehensive text for graduate students.
